News from the Community

Any news from your project, institution or country you would like to share with the community? This will be shared here.

Any difficulties with CESSDA metadata? A new list of contact persons is now available!

To maintain metadata quality within CESSDA, the CESSDA Main Office and CESSDA Metadata Office have established an issue tracking system via a Bitbucket repository.

Via this repository, Metadata Office would like to communicate and manage metadata quality issues in close cooperation with you as CESSDA Service Providers and CESSDA partners. We also use the repository to tell the SPs if there are problems with the metadata they provide to the CESSDA Data Catalogue (CDC). We believe that this is the easiest way to work together on these matters and handle and solve issues quickly and correctly.

Every CESSDA SPs now has at least one representative signed up in MDO bitbucket. In case you have an issue to report or any feedback to CESSDA MDO, kindly contact one of the person who has access to MDO bitbucket, and they can file an issue.

The list of the contact persons can be found on basecamp:
